including a panel having an outer surface layer, and an insulation layer secured to the outer surface layer, and mounting means extending from the panel for mounting the insulation module on an outer wall of the vessel, wherein the method includes securing the mounting means to the vessel to thereby provide an air gap between the insulation layer and the outer wall of the vessel when the insulation modules are mounted relative thereto.

33. The method of claim 32 wherein said insulation layer is of fibrous material treated to prevent release of fibres.

34. The method of claim 33 wherein said fibrous material is treated with a sealing agent, optionally an acrylic emulsion.

35. The method of claim 32 wherein said outer surface of said vessel includes the outer surface of a conical section of the vessel.

36. A process vessel insulated in accordance with the method of claim 32.

#### **Remarks**

The status of the claims, prior to the present amendment, is that Claims 1 and 2 are pending, with Claims 3 to 18 having been cancelled prior to the calculation of the
